

Help Our Community Access Critical Cancer Care Services

We are committed to helping residents of Butte and Tehama counties access the lifesaving cancer care services they need. Adventist Health is providing state-of-the-art technology, clinical trials, expanded services and individualized patient treatment close to home. Additional investment in technology, facilities, services and patient support is needed.

Expansion of Treatment Services

Within months of the Camp Fire, Adventist Health opened the Cancer Care Center in Chico to provide access for patients who lost their care location in Paradise. The Center is a partnership with Adventist Health and UC Davis Health, providing local access to clinical trials and oncologists, pathologists, surgeons and other cancer experts at UC Davis. Since April, 2019, the Center is exceeding its capacity and plans are underway to expand the Center.

Exceptional Patient Care Experiences

We also support our patients while they are undergoing treatment is just as important as expanding services. With your support, we can help cancer patients with:

- Access to drugs and treatment
- Nutrition support and education
- Comfortable infusion chairs
- Transportation to and from the Center

Transforming cancer care in Paradise and across Butte and Tehama Counties is a long-term commitment. You make the difference.
